SpeechExec Pro Dictate

SpeechExec

LFH 7255

The most comfortable way to dictate, ever

SpeechExec Pro Dictate 7255, the network-based dictation software is designed for the requirements of professional digital dictation users and provides authors with easy-to-use functionality for organizing recordings clearly and transparently. Dictation sound files can be automatically transferred via a company network, sent by e-mail or uploaded onto an FTP server, depending on requirements. SpeechExec Pro Dictate 7255 is the solution that sets the pace in today's fast-moving business world.

Key benefits

- Efficient handling of sound files from dictation to archiving makes job retrieval simple and fast.
- Priority indexing allows authors to easily define urgent jobs.
- Spoken instructions improve communication with the transcriptionist.
- Data protection (encryption and decryption) allows only authorized persons to access your documents.
- Job status information allows you to track work in progress.
- "Job started" and "job finished" notifications ensure no time is wasted.
- Visible and audible job notifications eliminate errors and increase turnaround time.

- **Recommended:** Pentium IV or similar, 1 GHz and 1 GB RAM
- **Hard disk space:** 100 MB for SpeechExec, 250 MB for Microsoft .NET Framework
- 1 free USB port
- **Recommended minimum transfer rate for LAN:** 100Mbit/s
- **Operating System:** MS Windows 2000 SP4, XP SP2, Vista

Package contents

- SpeechExec Pro Dictate Software
- USB Smart Key
- Installation Guide

Product highlights

Intuitive user interface

The visual workflow management enables you to clearly organize your dictations. Efficient handling of sound files from dictation to archiving makes job retrieval simple and fast.

Worklist / Workflow

Due to the familiar folder view, similar to Windows Explorer, the time needed to get accustomed to SpeechExec Pro can be kept to a minimum. A configurable worklist enables the user to sort, hide and show columns, etc., while the job status indicator shows whether a dictation is pending, in progress or finished.

Priority indexing

Priority indexing allows authors to easily define urgent jobs. Spoken instructions improve communication with the transcriptionist.

Data Protection

Data protection (encryption and decryption) allows only authorized persons to access your documents. Thanks to the professional DSS Pro file format you can protect all dictation files with passwords, in order to avoid unauthorized access.

Job status information

Tracking work in progress is enhanced by the job status information feature. "Job started" and "job finished" notifications ensure no time is wasted.

Job notifications

Visible and audible job notifications eliminate errors and increase turnaround time.

Smart Key

Thanks to the new Smart Key, the license key is automatically moved from SmartKey to PC, so there is no need to type in long license keys.

Digital Speech Standard (DSS)

The .dss file format is the international standard for professional speech processing. Offering outstanding audio quality for recorded voice, .dss files allow a high compression rate, reduce file size, network traffic and required storage capacity. The format also allows additional information such as client/patient name and document type to be stored in the file header, further facilitating file organization.
