SpeechExec

LFH 7257

Transcription has never been so comfortable

The SpeechExec Pro Transcribe 7257 professional transcription software lightens the everyday workload of the busy transcriptionist. Advanced features allow ever increasing dictation volumes to be handled efficiently, while a clear and transparent overview of pending jobs, job notifications and actual job information during transcription allows documents to be created more quickly and with greater accuracy. This innovative transcription solution allows you to create an efficient, smooth-running and stress-free working environment for transcriptionists.

Key benefits

- Visual workflow management enables priority documents to be transcribed in order of preference
- Actual job information during transcription provides all relevant dictation data, such as length, author name, key words and priority status
- Individual organization of workload with multiple sort/filter options
- Clear job overview (dictation, author information, length etc.) allows more efficient organization and planning of workloads
- "New job" alarm for immediate transcription start
- Excellent DSS sound quality
- Automatic transfer of dictation files via network, e-mail and FTP
- Speech recognition-ready

sense and simplicity

Specifications

PC requirements

- **Minimum:** Pentium III, 500 MHz and 512 MB RAM
- **Recommended:** Pentium IV or similar, 1 GHz and 1 GB RAM
- **Hard disk space:** 100 MB for SpeechExec, 250 MB for Microsoft .NET Framework
- 1 free USB port
- **Recommended minimum transfer rate for LAN:** 100Mbit/s
- **Operating System:** MS Windows 2000 SP4, XP SP2, Vista

Package contents

- SpeechExec Pro Transcribe Software
- USB Smart Key
- Installation Guide

Product highlights

Visual job overview

The visual workflow management and job overview enables you to organize and plan your workload more efficiently. Thanks to visual workflow management, the transcription of priority documents in your preferred order is managed as straightforwardly as possible. Multiple sort/filter options allow for individual organization of files.

“New job” alarm

The alarm sound notifies the recipient of new jobs coming in, in order to allow an immediate start of the transcription.

Access to job information

Relevant data such as length, author name, key words and priority status are accessible throughout the entire transcription process by means of a dictation properties display.

Worklist / Workflow

Due to the familiar folder view, similar to Windows Explorer, the time needed to get accustomed to SpeechExec Pro can be kept to a minimum. A configurable worklist enables the user to sort, hide and show columns, etc., while the job status indicator shows whether a dictation is pending, in progress or finished.

Attach a document

SpeechExec Pro Transcribe offers the capability to attach a document directly to a dictation. This supports document archiving and retrieval.

Versatile player

Various features, such as a graphical position indicator, an audio volume meter and audible scan function facilitate the transcription process. Speed control, DSS Pro / DSS / WAV / WMA / MP3 playback and automatic backspace provide first-class reproduction of your dictations.

Automatic file transfer and updates

Dictation files are transferred automatically using the network, email or FTP. Automatic updates via internet as well as the possibility to define default settings provide highly convenient administration.

Digital Speech Standard (.dss)

The .dss file format is the international standard for professional speech processing. Offering outstanding audio quality for recorded voice, .dss files allow a high compression rate, reduce file size, network traffic and required storage capacity. The format also allows additional information such as client/patient name and document type to be stored in the file header, further facilitating file organization.
