SpeechMike Exec Pro

SpeechMike

LFH 7274

Total control at your fingertips

A professional recorder and dictation software is now combined into one powerful dictation package. SpeechMike Pro allows single-handed recording control, as well as PC navigation and management of dictation files with maximum user comfort. Ergonomically designed push buttons, trackball mouse and scroll wheel allow total recording control and navigation of your PC. There is no need to reach for a standard PC mouse to open or scroll through documents or for Internet browsing. Combined with the professional recording software, SpeechMike Exec Pro Dictate, document creation and management are made even simpler. Advanced features such as file encryption guarantee that only authorized staff can access the files, and a job status overview tracks work in progress.

Quick control

- Professional PC dictation solution
- One-thumb operation of all dictation features with push buttons
- Ergonomic and lightweight design for best maximum comfort
- Intuitive software user interface for easy handling of dictation files

PHILIPS
sense and simplicity

Key benefits

SpeechMike Pro

- **PC dictation microphone with push buttons**
- **Dust-proof optical trackball and scroll wheel** for precise navigation through all documents
- **Clearly visible LEDs** indicate insert, overwrite and recording mode
- **Ergonomic and lightweight design** for maximum user comfort
- **Superb recording quality** ensures crystal clear playback, ideal for speech recognition
- **Simple connection** to the PC via USB

SpeechExec Pro Dictate

- **Easy-to-use** dictation functionality for organizing recordings
- **Priority indexing** allows authors to easily define urgent jobs
- **Spoken instructions** improve communication with the transcriptionist
- **Data protection** (encryption and decryption) allows only authorized persons to access your documents
- **Job status information** allows you to track work in progress
- **Visible and audible job notifications** eliminate errors and decreases turnaround time
- **Dictation files** can be automatically transferred via company network, e-mail or uploaded onto an FTP server for further processing

with 4-Position slide switch

Specifications

Specifications

- **Dimensions (W x L x H):** 1.7 x 6.1 x 1.1 in. / 43 x 155 x 30 mm
- **Weight:** 5.5 oz. / 155 g
- **Acoustic frequency response:** 200 – 6,000 Hz
- **Output power:** >100 mA

PC requirements (SpeechExec)

- **Minimum:** Pentium III, 500MHz and 256MB RAM
- **Recommended:** Pentium IV or similar, 1GHz and 1GB RAM
- **Hard disk space:** 100MB hard disk space for SpeechExec, 250MB for Microsoft .NET Framework
- 1 free USB port
- **Recommended minimum transfer rate for LAN:** 100 Mbit/s
- **Operating system:** Windows Vista, Windows XP (with SP 2), Windows 2000 (with SP 4)

Green specifications

- Compliant to 2002/95/EC (RoHS)
- Lead-free soldered product

Operation conditions

- **Temperature:** 5° - 45° C / 41° - 113° F
- **Humidity:** 10 % - 90 %

Package contents

- SpeechMike Pro
- SpeechExec Pro Dictate Software
- USB Smart Key
- Hanging bracket
- User manual

Product highlights

First class handling

Simplicity and easiness to use are two main guidelines for Philips products. Designed with four ergonomic zones, it has been tested and proven by users for best fit of the human hand.

Easy to use

This all-in-one unit gives the user a third hand. No need to detach the hand from the microphone when moving the mouse around the PC – much like working with endoscopes. Full control over the application while enjoying the ease of dictation with this unique device.

Scroll- and volume wheel

An additional scroll wheel gives the user the choice of adjusting the volume of the playback without removing the hand of the microphone or looking at the screen.

Light weight

For every day usage, also the weight comes into play. It has been made very light weight and perfectly balanced, so it is easy and comfortable to handle at all times.

Best mobile pointing device

The integrated optical track-ball is the best mobile pointing device on the market, giving you control over quick and accurate movements.

Highest ESD (electro-static discharge) protection

Working in an office environment one can charge oneself with electrostatic energy. Therefore the Philips hardware is highly protected against that kind of discharge via the hardware.

SpeechExec Pro Dictate

SpeechExec Pro Dictate, the network-based dictation software, facilitates the sharing and archiving of dictations and streamlines communication between author and transcriptionists. It includes advanced features such as file encryption and integration with legal and medical IT systems.

Digital Speech Standard (.dss)

The .dss file format is the international standard for professional speech processing. Offering outstanding audio quality for recorded voice, .dss files allow a high compression rate, reduced file sizes, network traffic, and required storage capacity. The format also allows additional information, such as client/patient name, document type to be stored in the file header, further facilitating file organization. The .dss Pro format is an extension to the .dss format that supports file encryption to protect confidential dictation data and optimizes speech recognition results.
